PROFILE

I am a Physics undergraduate with strong analytical aptitude and excellent communication skills. Experienced in project management, stakeholder relations, and organizing complex activities.

Raised in Catania, my goal is to make a positive contribution to our planet through physics: a discipline that provides the tools to understand the universe, develop new technologies, and collaborate with brilliant minds, in the unique setting of Tuscany.

In my free time, I dedicate myself to personal projects ranging from nanomaterials to quantum materials, from deep neural networks to nuclear fusion energy processes, always seeking stimulating challenges and innovative solutions.

EXPERIENCE

CEO & CTO – *SmartLight*

2025–Present

◇ Project management and coordination of operational activities. Interaction with entities and stakeholders, data analysis, planning, and presentation of results.

AUTHOR OF UNIVERSITY STUDY NOTES

2024–Present

◇ Production of structured and accessible content (Physics 1, Mathematical Methods). Development of communication, organizational, and synthesis skills.

EDUCATION

BSC IN PHYSICS – *University of Pisa*

2023–Present

SCIENTIFIC HIGH SCHOOL DIPLOMA – *Liceo Scientifico Enrico Boggio Lera, Catania*

2017–2022

◇ Final Grade: 94/100
